

# The first CRIPTO-FIAT platform in the world

PASSION FOR CRYPTO INVESTMENT

## Why do we have a hummingbird in our logo?

The meaning of the symbol of the hummingbird over time reflects our values

01

### Great achievements

Formerly, in many cultures, talismans were carried in the form of hummingbirds, as a symbol of work, as a representation that "A group capable of working in a team will be able to achieve great things" **"A group capable of working in a team will be able to achieve great things"**.

02

### Prosperity

When flying, the infinity symbol can be observed in its movements and it has been given a meaning of prosperity, since it forms this symbol with its wings approximately 50 to 70 times per second. It is said that seeing a hummingbird is a sign of **good luck**.

03

### Protection / Security

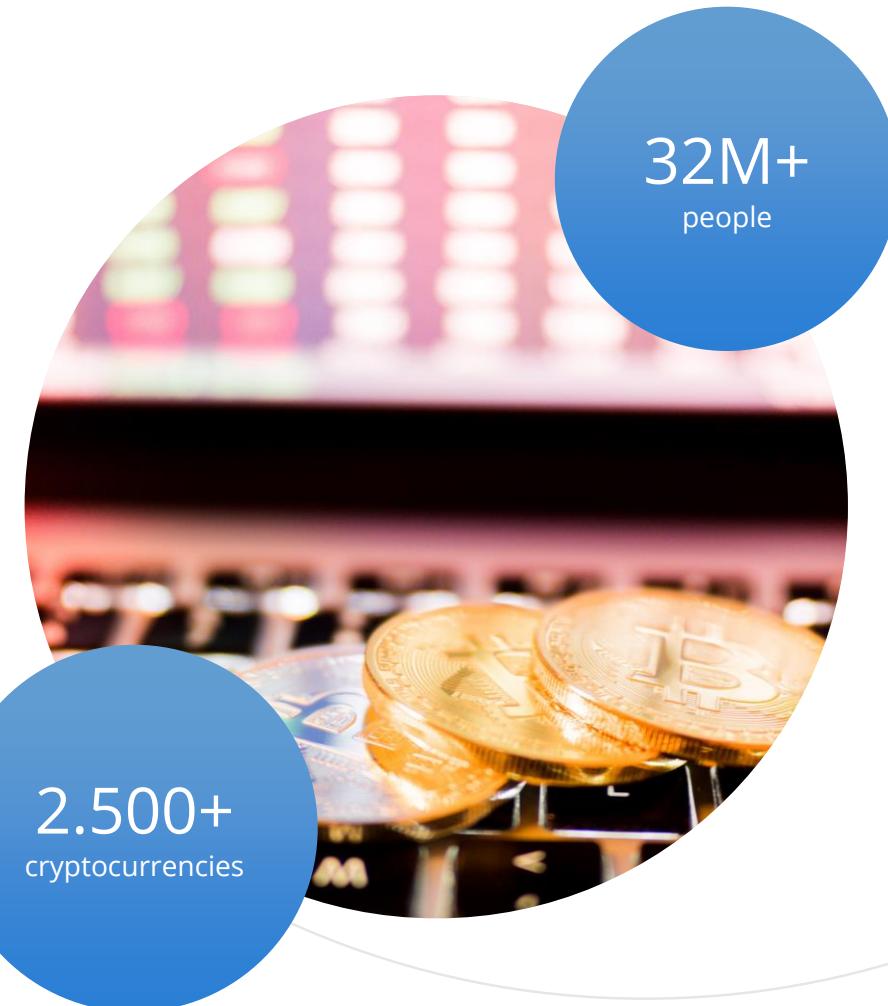

In time of war it represented protection for warriors. The god of war and the sun, Huitzilopochtli, of the mexica culture, had a hummingbird in his left hand.

# The Crypto-markets

Cryptocurrencies are here to stay and have become one of the main investment options, attracting more and more people, companies and institutions. It is estimated that there are more than 2,500 cryptocurrencies in the world and that more than 32 million people already use them.

Cryptocurrency markets are subject to growing interest both from the media and from investors. It is estimated that this market will have a value of 3.6 trillion dollars within 10 years (\*).

On the other hand, the problem of investments in crypto assets are their high volatility, the thousands of options and the large number of scams that have emerged in recent years, so it is important to enter the world of cryptocurrencies with the help of qualified professionals.

# Blockchain Technology

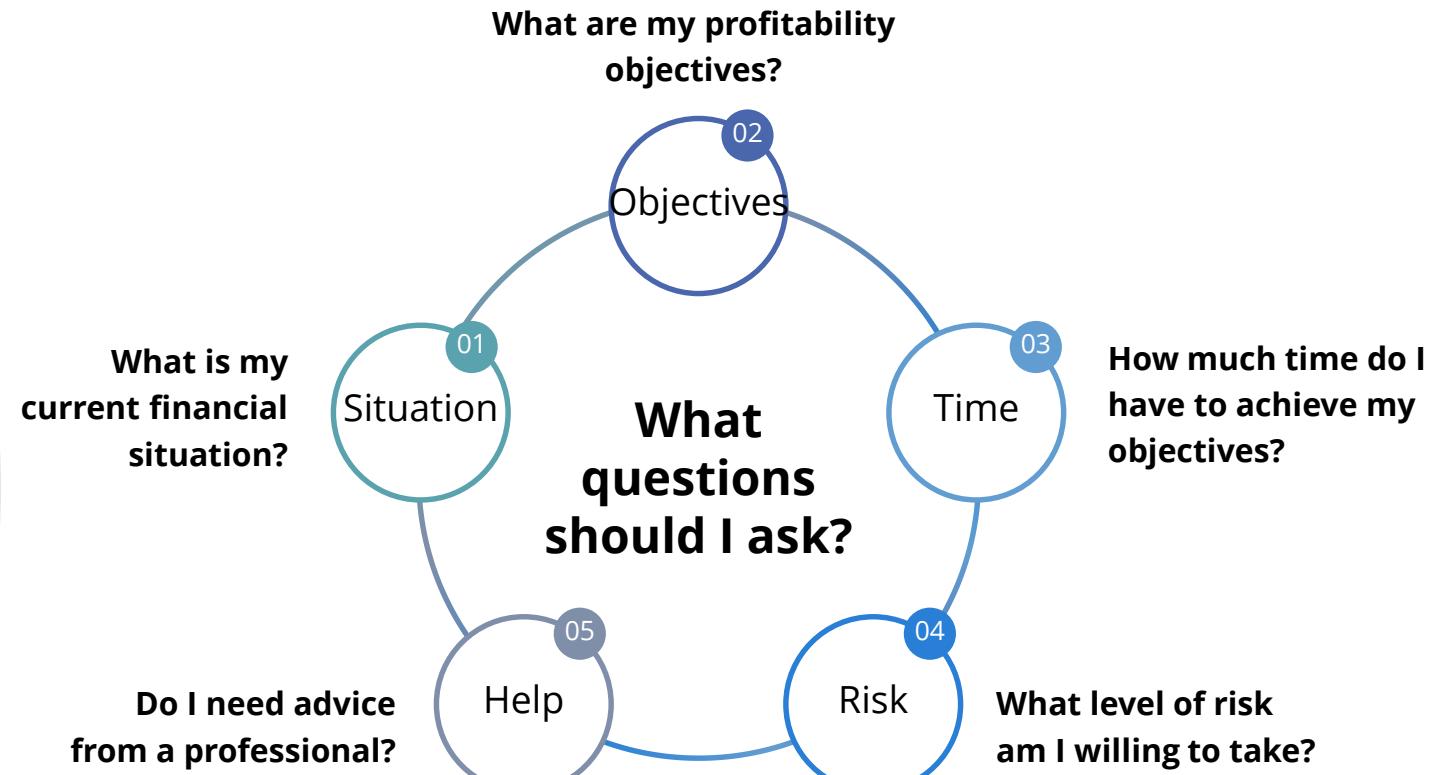

## One of the pillars of the fourth industrial revolution

Blockchain is a gigantic accounts ledger where all movements are reflected and where transactions (blocks) are linked and encrypted. The purchase/sale of cryptocurrencies is based on blockchain technology, which being publicly accessible, allows the tracking of each transaction, ensuring that it is safe, fast, transparent and reliable.

# Investment Profile

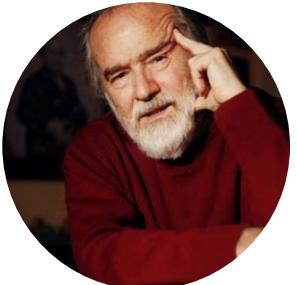

Before making any investment, it is very important to know yourself. If you know your investor profile, it will be easier to make decisions and implement them. If it is not easy for you, allow an expert to advise you and help you find your investment strategy.

## High profitability available to everyone

From just \$ 100, anyone can enjoy the crypto-asset management experience of **mind.capital** and the daily returns.

# About us

We are experts in crypto-asset profitability

**mind.capital** is a high-tech crypto-asset investment system led by **Gonzalo García-Pelayo** together with an international team of experts in mathematics, investments and technology.

After several years researching **blockchain** technology, we are able to **study in real time the evolution of the main crypto-assets and their sale price in different currencies** and find the optimum moments to buy and sell. Our platform, **from just \$100**, allows anyone to participate in the returns obtained.

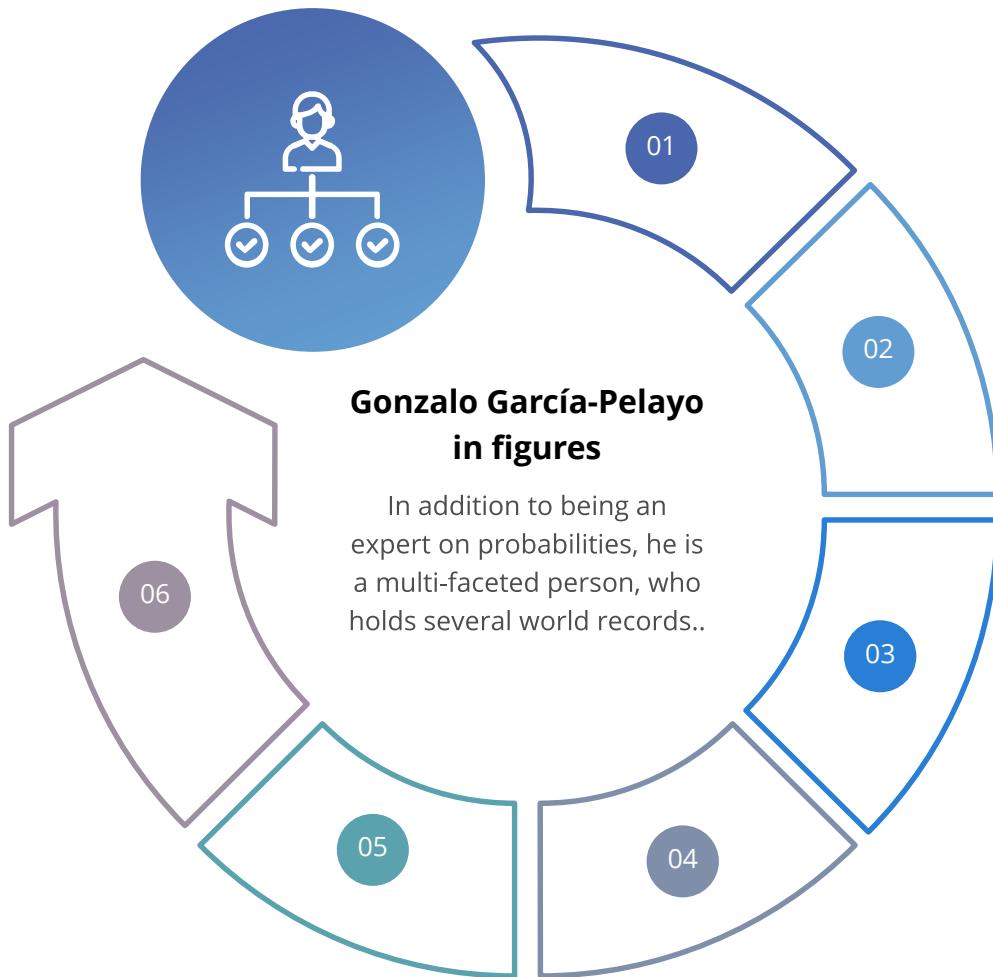

# Gonzalo García-Pelayo

## heads mind.capital

Gonzalo García-Pelayo has been a music producer, film director, radio host, television host and is famous for having beaten the casinos in the nineties with his roulette system, the story of which has been shown in movie theaters with the movie «The Pelayos». He has also written several books on betting, «The fabulous story of Los Pelayos», «Learn to play poker with Los Pelayos» y «Bet to win».

In 2006 he opened his school to win at online poker «Los Pelayos Poker» and shortly after, revolutionized the world of sports betting. **Now, he has turned all his experience to find a way to earn money with crypto-assets.**

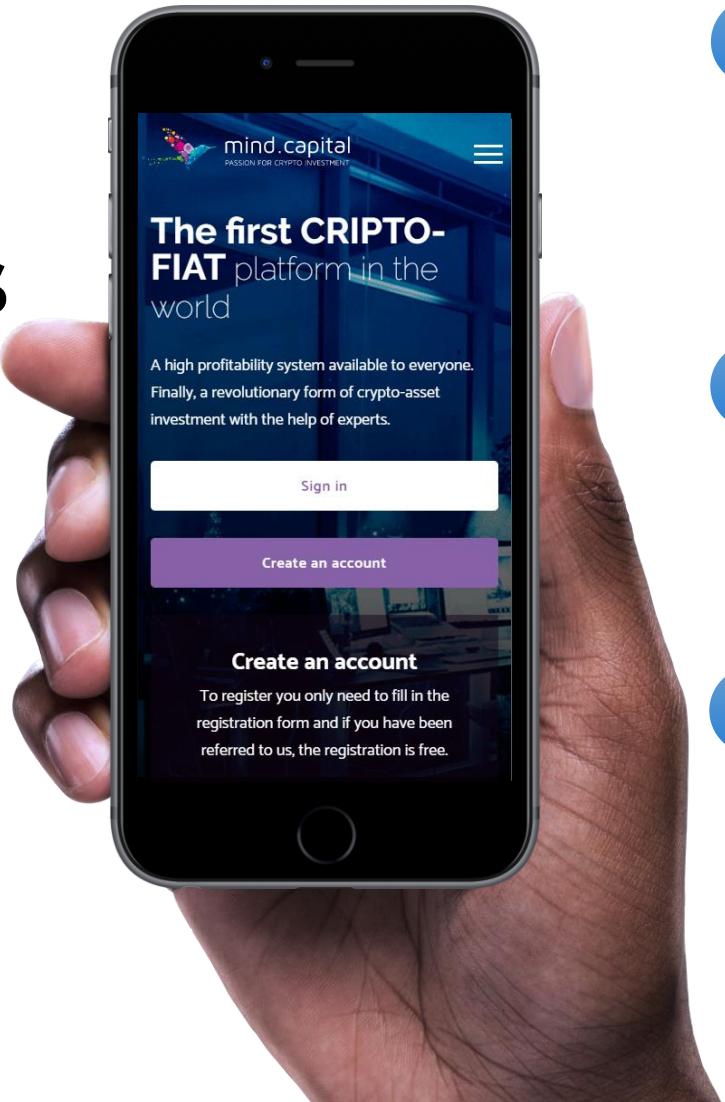

- 01 He is the person who has won the most money at roulette in the world
- 02 He is the only person in the world who has developed proven winning systems for casinos, horse races, pools, sports betting and poker
- 03 He holds the world record in the number of records produced in a year
- 04 His film "Living in Seville" is considered one of the 100 best Spanish films in history and one of the best 900 worldwide
- 05 He is one of the few Spaniards who has appeared on the cover of Le Monde
- 06 He has directed 14 films and has produced more than 160 albums and is known as one of the fathers of Andalusian rock

# ¿How does it work?

## Profitability is our priority

The technology developed by mind.capital allows us to **study the evolution of the main crypto-assets and their price in different currencies** and operate in the market by using advanced algorithms. After years of research, we have optimized the system to obtain maximum profitability.

**Real-time monitoring and analysis of the main crypto-assets and their price in different currencies**

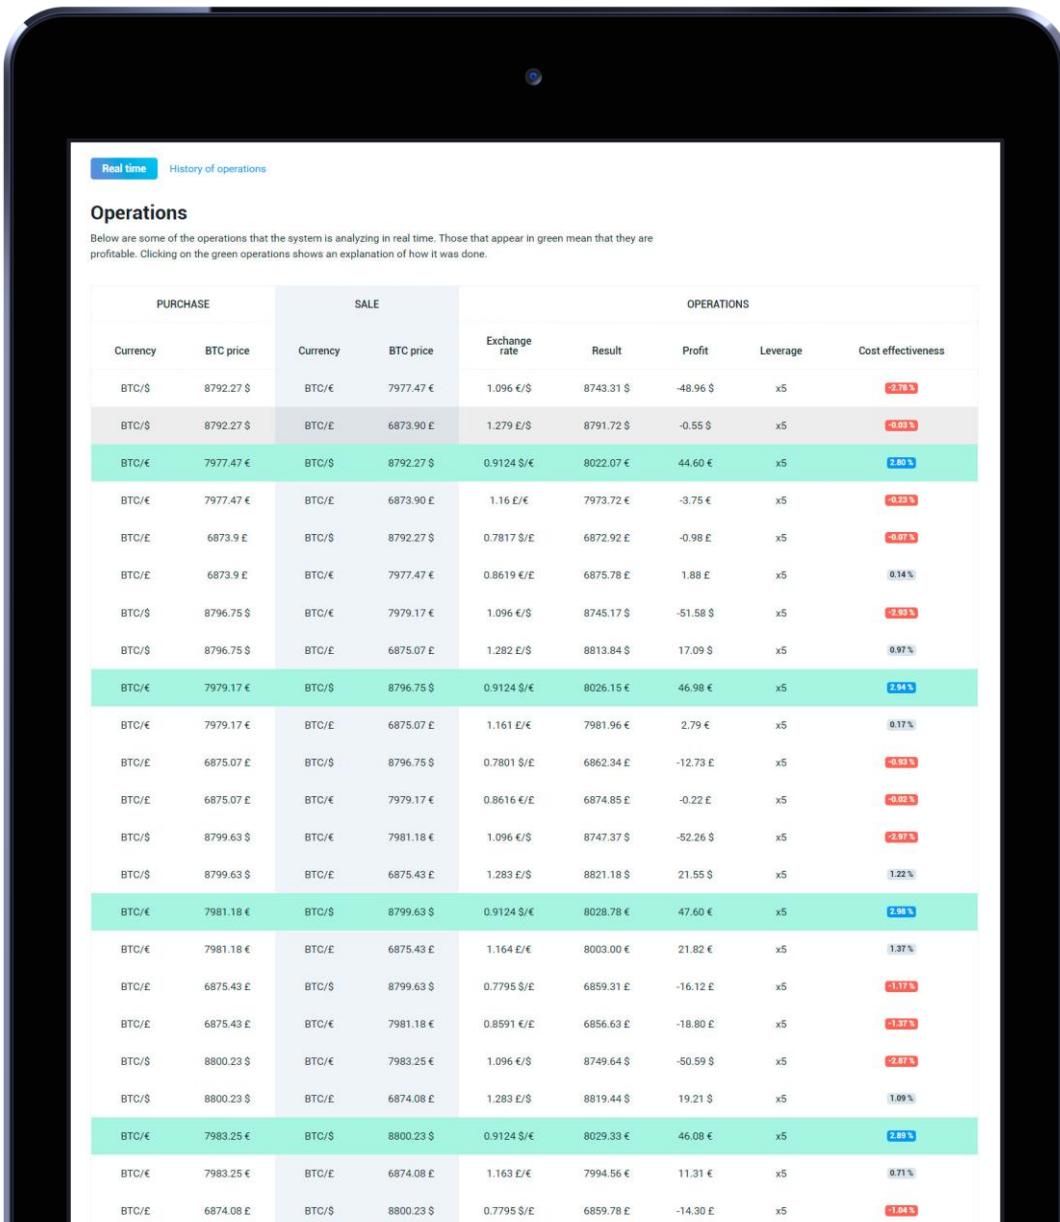

**AI algorithms developed to find buying/selling opportunities**

**Optimization and continuous adaptation of the platform**

# The system in action

## We like things to be clear

From your control panel at any time you can **see in real-time how our Artificial Intelligence algorithms** work finding investment opportunities and the profitability obtained in each operation performed.

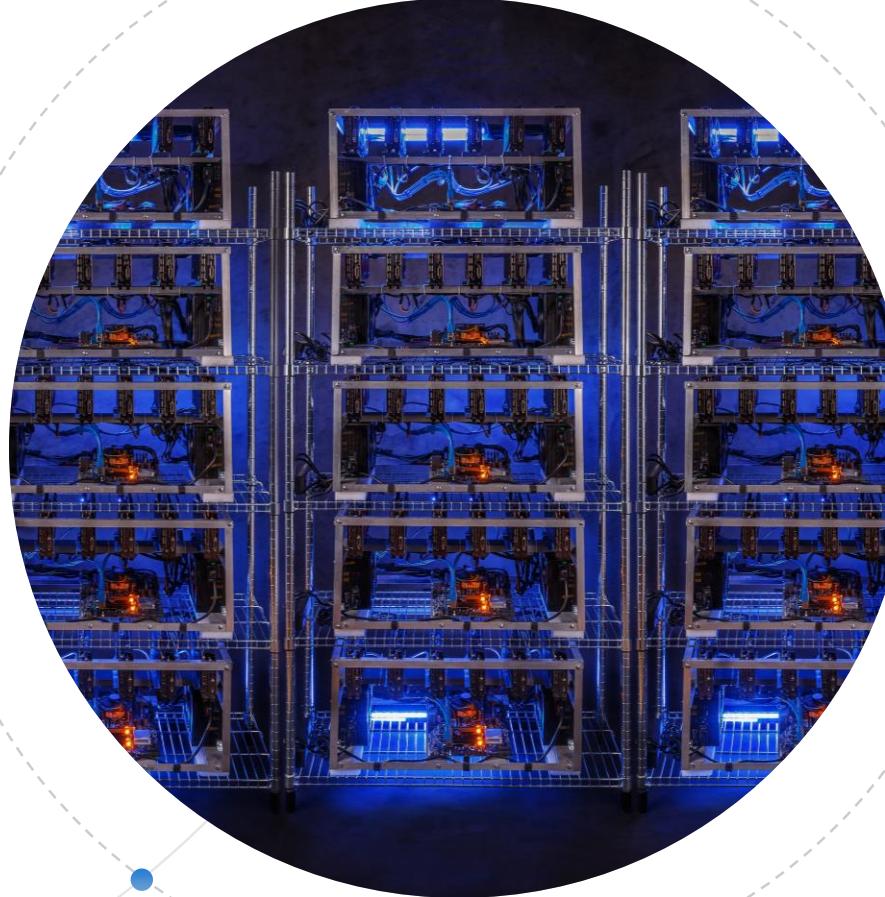

The tablet screen shows a "Real time" operations dashboard. At the top, there are tabs for "Real time" and "History of operations". Below this, a section titled "Operations" contains a brief explanatory text: "Below are some of the operations that the system is analyzing in real time. Those that appear in green mean that they are profitable. Clicking on the green operations shows an explanation of how it was done." The main area is a table with the following columns: PURCHASE, SALE, and OPERATIONS. The PURCHASE and SALE columns have sub-columns for Currency, BTC price, and Exchange rate. The OPERATIONS column has sub-columns for Result, Profit, Leverage, and Cost effectiveness. The table rows alternate in color between light gray and green, indicating profitability. Each row provides specific details for a trade, such as the date, time, and amount for purchase and sale, along with the resulting profit percentage and leverage used.

# Blockchain Integrated

Having **blockchain** integrated **ensures** that the money you have in your account is really within the platform and **just one click away from your wallet**.

# What do we offer?

## Profitability

The entire system is implemented to optimize performance and profitability.

## Daily settlement

Every day, the platform distributes the profitability obtained the previous day. Every working day you will have the profits obtained in your account.

## Liquidity

You can request the recovery of the contribution after the end of the investment term.

## Blockchain

The entire platform is integrated with Blockchain, so both payments and withdrawals are made automatically and in a few minutes.

## Ease of use

Contributions can be made with both BTCs and credit card.

## Technology

Years of research and development (R&D) and the latest technology for the benefit of the investor.

## Available for anyone

Any person, from \$ 100, can participate in the profitability, experience and technology developed by mind.capital.

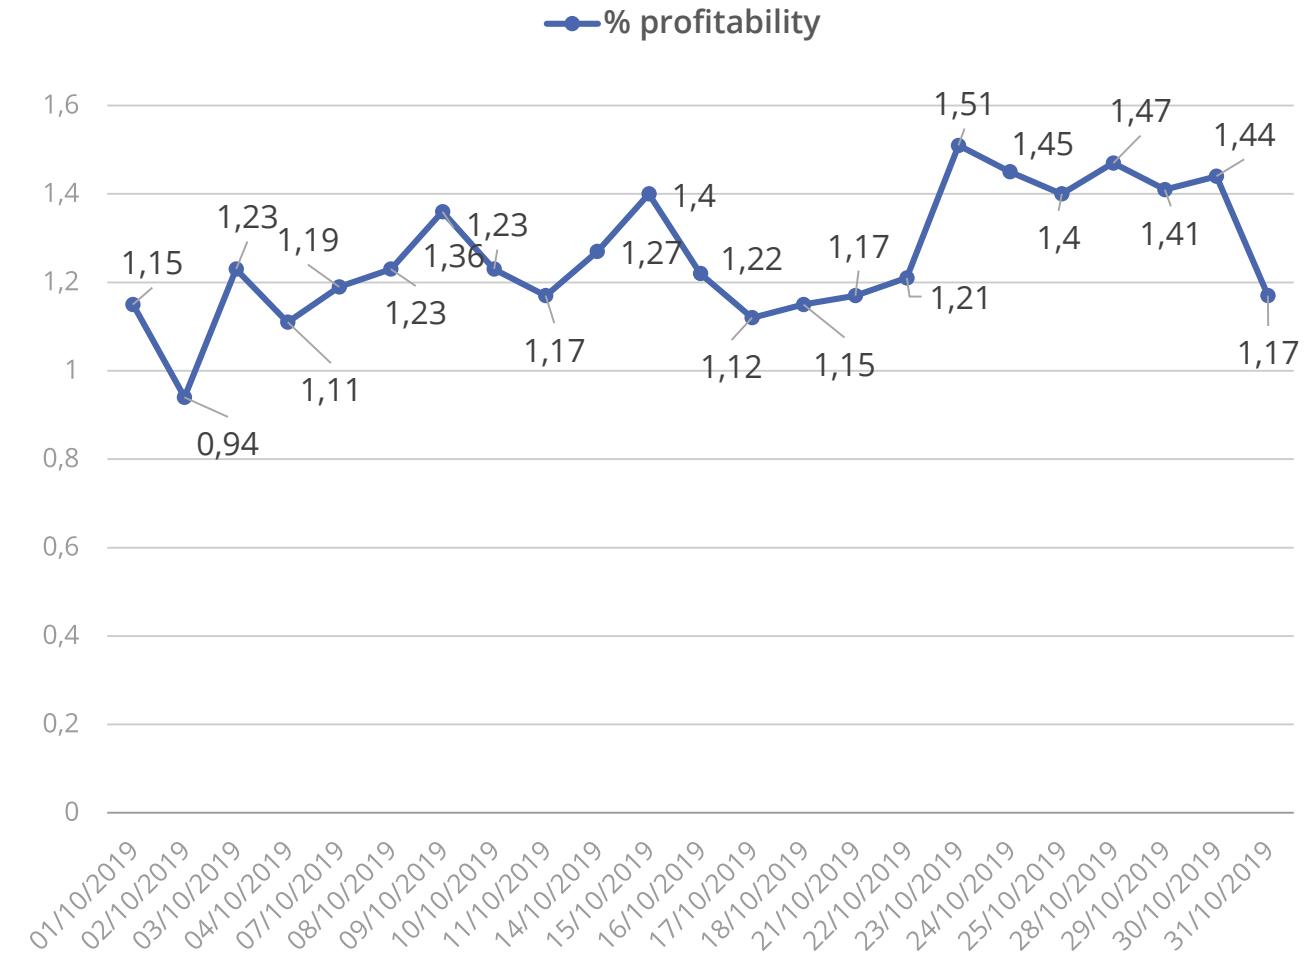

## Team

In addition to Gonzalo García-Pelayo, there is an international team of experts in mathematics, investments and technology behind the mind.capital.

# Historical Profitability

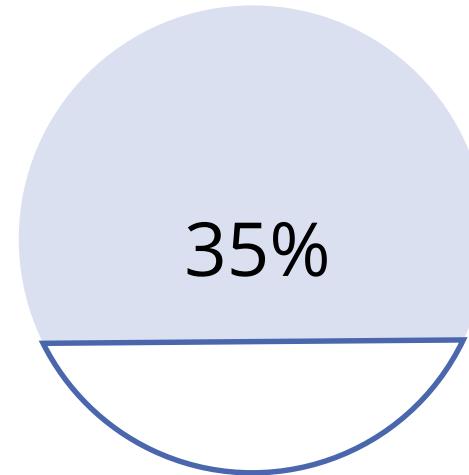

In the latest reports mind.capital is producing a daily return of between 0.5 and 1.5%.

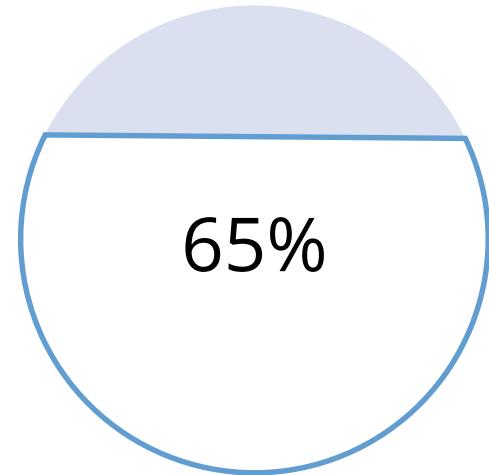

# Distribution of profits

**Every day, the platform distributes the benefits obtained the previous day**

Every day the profits obtained the previous day are distributed among the participants, of which mind.capital retains 35% in management and maintenance expenses.

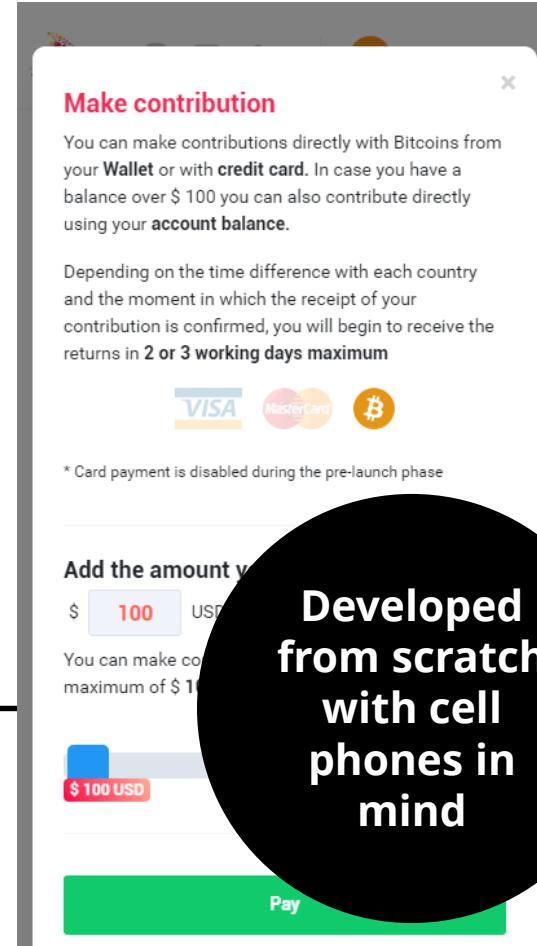

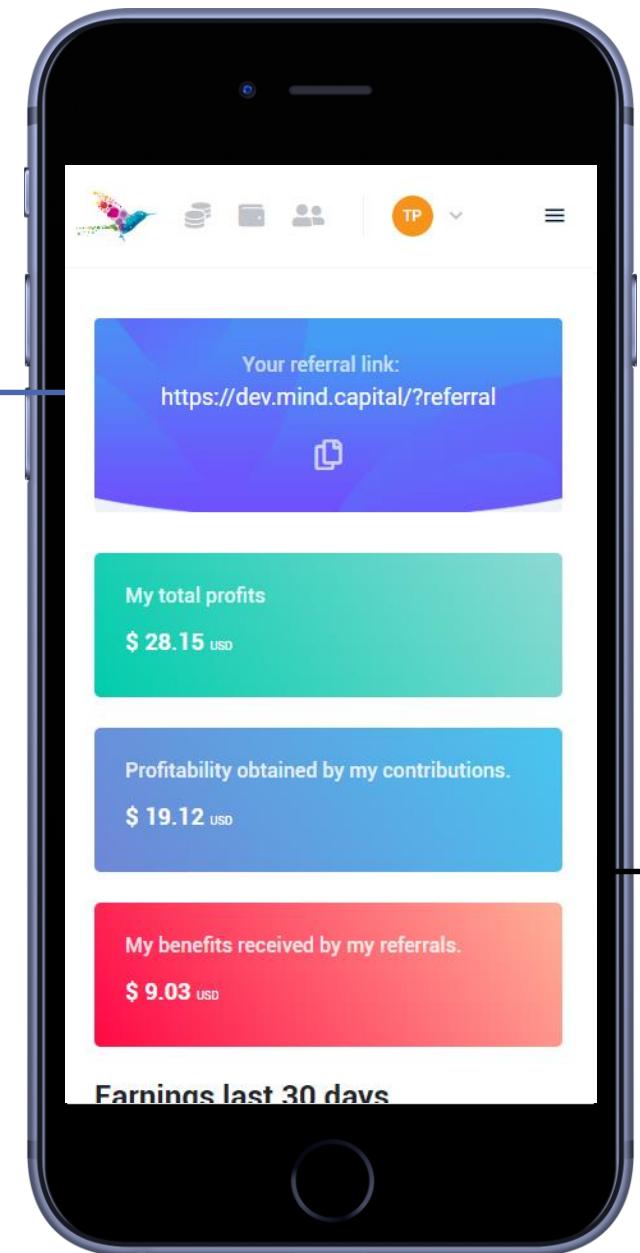

**Management and maintenance expenses**

**Profits collected daily**

# How can I participate?

01

## Create an account

To register you only need to fill in the registration form and by providing the code of your referral the registration is **free**.

[Create an account](#)

02

## Select the amount

Once inside your administration panel, click on make a contribution and select the amount between \$ 100 and \$ 100,000.

03

## Start making profits

From the first moment you will begin to receive daily in your account the part that corresponds to you from the profitability obtained by the system the previous day.

# RoadMap

Our main milestones

October  
2017

## The beginnings

Gonzalo García-Pelayo began to be interested in the peculiarities of cryptocurrencies and began to research ways to obtain profitability

## International experts

He started working on his system with mathematical experts, engineers and analysts from different countries to develop algorithms and software to exploit the inefficiencies found

## The inefficiencies

After several months of research and tests, Gonzalo discovered that there are inefficiencies between cryptocurrency markets and currencies

## **mind.capital**

After more than a year of development, tests and proven profits, now everything is ready to create a platform that allows the system to be brought closer to everyone meaning that anyone can invest. The new platform is going to be called **mind.capital**

## Blockchain

Mind.capital is integrated with blockchain. The first tests of investments and automatic withdrawals are made using this technology

## Development of the platform

An American company specialized in Blockchain is hired to develop mind.capital

## Demonstration in real-time

The platform is perfected so that some of the operations performed by the system can be seen in real time

**Madrid**

Opening of offices in Madrid

## **Pre-launch**

Pre-launch of the platform for experts and large investors

## Launch

Launch of the platform for the public

# Scams and Ponzi schemes

Due to the cryptocurrency boom, more and more scams and fraudulent projects are emerging. The difference between a scam and a real project is the information that is offered, the generation of value and the proven facts.

**mind.capital** is a serious investment system which has been developed over several years, which has a team of recognized professionals and only receives income when it obtains profits.

01

## Real value

Most cryptocurrencies do not create real value. mind.capital generates value by assuming positions in the crypto-asset market, and so that there are no doubts, what is generated is distributed daily.

02

## Fake ICOs

Most scams are fake ICOs. mind.capital is not an ICO, rather, it is a platform that invests in crypto-assets following a developed and tested system.

03

## Who is behind them

Fraudulent projects either do not tell you who is behind them or they place little known people at the forefront who then disappear. In mind.capital, **Gonzalo García-Pelayo**, who is widely known in the world of music, film and probabilities, leads the project together with a large team of developers.

04

## Pyramids or Ponzi schemes

In these systems the payments of the returns come from the money of the new investors. mind.capital in no case uses percentages of contributions for the payment of the referral system. The payment of the daily returns comes exclusively from the benefits and the platform is economically supported by withdrawing 35% of the returns generated.
